

NOMINET

WHERE WIFI DOESN'T WORK, WE DO

DYNAMIC SPECTRUM MANAGEMENT:
CONNECTING THE WORLD

THE EXPERTS AT GEO-LOCATION DATABASES

No one should miss out on the internet simply because of where they live. At Nominet, we can support you in reaching them with TVWS. We're an Ofcom-approved geo-location database, experienced at co-developing the UK TVWS regulatory framework and deploying live TVWS networks.

We know how countries differ in their regulations and offer support for potential or existing TVWS network operators, including:

- Use case evaluation
- Spectrum availability studies
- Link feasibility assessments
- Network deployment advisory services
- Radio planning tools

**To learn more, stop by the Nominet booth.
